

Army Tactical Missile System (ATACMS) Block II Missile Successfully Completes Developmental Test

PRNewswire

WHITE SANDS MISSILE RANGE, N.M.

An Army Tactical Missile System (ATACMS) Block II missile successfully dispensed 13 Brilliant Anti-Armor (BAT) submunitions against a remotely-controlled array of 21 targets moving on the Zumwalt Track during a flight test here today.

Seven of the BAT submunitions hit targets, with six of those hits being in vulnerable areas.

Soldiers from 2-18th Field Artillery, Fort Sill, Oklahoma fired the missile from a MLRS M270 Improved Position Determining System launcher, with the missile flying 75 miles to engage the targets.

Lockheed Martin Missiles and Fire Control - Dallas is the prime contractor for the ATACMS Block II system.
