

# Lockheed Martin Awarded Government-Wide Environmental Services Contact

PRNewswire  
SEABROOK, Md.

Lockheed Martin was awarded a General Services Administration (GSA) Environmental Advisory Services (EAS) contract to provide environmental services to any federal customer.

Under this government-wide contract, Lockheed Martin's Systems Support & Training Services will help customers meet environmental regulations requirements, assess ecological risks, and plan environmental remedies and strategies. Responsibilities will include scientific and technical support for environmental planning, compliance assessment, survey design and execution field sample collection, chemical analysis and bioassays, hazardous waste management, pollution prevention, emergency response planning, safety and health, ecological assessments, geographical information systems (GIS) and remote sensing applications, environmental data management, and quality assurance. Lockheed Martin has provided such services to the Environmental Protection Agency (EPA), Department of Energy (DOE), Department of Defense (DOD), and Federal Aviation Administration (FAA) for 26 years.

"Lockheed Martin is proud to support responsible stewardship of the nation's natural resources through the environmental mission of federal agencies," said David J. Posek, president of Systems Support & Training Services. "This contract vehicle will allow us to leverage our 26 years of environmental experience, technology, cost-effective services, and worldwide presence to effectively meet agency needs."

This contract, which complements other Lockheed Martin Federal Supply Services (FSS) contracts such as Information Technology and Professional Engineering Services, provides federal agencies the ability to combine varying service types across GSA schedules, use streamlined ordering procedures, and make blanket purchases agreements, partnerships and subcontract arrangements. More information on EAS GSA services can be found at <http://www.lmsg.lmco.com/gsa/>.

Lockheed Martin Systems Support & Training Services is a business unit of the Corporation's Technology Services area. Systems Support & Training Services provides state-of-the-art professional and technical support in training, simulation, electronic systems and environmental management.

Headquartered in Bethesda, Maryland, Lockheed Martin is a global enterprise principally engaged in the research, design, development, manufacture and integration of advanced-technology systems, products and services. The Corporation's core businesses are system integration, space aeronautics, and technology services. Lockheed Martin has 1999 sales surpassing \$25 billion.
