

Lockheed Martin To Provide Update On Its Capabilities For NASA Space Exploration Programs

PRNewswire

Who:

- * John C. Karas, Vice President, Space Exploration, Lockheed Martin Space Systems Company
- * James H. Crocker, Vice President, Civil Space, Lockheed Martin Space Systems Company
- * Kenneth S. Reightler, President, Space Operations, Lockheed Martin Information & Technology Services

What:

Executives from Lockheed Martin's Space Systems Company and Information & Technology Services business area will discuss the broad range of human and robotic space exploration projects and far-reaching capabilities that Lockheed Martin is bringing to bear for NASA. Among the topics discussed will be space power systems, advanced transportation systems, lunar architecture and infrastructure, and human spaceflight systems. In addition to taking a look at the current and future needs of space exploration and the challenges and opportunities that lie ahead, the presentation will also include a live demonstration from Lockheed Martin's Exploration Development Lab performed remotely from the National Press Club briefing room.

When:

Friday, August 18, 2006; 9:30 - 11:00 a.m.

Where:

The National Press Club
First Amendment Room - 13th Floor
529 14th Street NW
Washington, DC

CONTACT/RSVP:

Tom Greer; 301-897-6195; e-mail: thomas.greer@lmco.com

Headquartered in Bethesda, Md., Lockheed Martin employs about 135,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.
