Lockheed Martin Awarded \$789.8 Million THAAD Production Contract

PR Newswire DALLAS

DALLAS, March 30, 2011 / PRNewswire / -- Lockheed Martin (NYSE: LMT) has received a production contract totaling \$789.8 million to produce the Terminal High Altitude Area Defense (THAAD) Weapon System for the Missile Defense Agency.

The contract includes \$694.9 million and for the production of 48 THAAD interceptors, six THAAD launchers, four fire control units and additional support equipment. An option for additional launchers in the amount of \$94.8 million was also award for a total value of \$789.8 million. These components will be employed by THAAD Batteries 3 and 4 for the U.S. Army. Delivery to Batteries 3 and 4 will be completed in 2013.

"We have great confidence in the production plans established to deliver the THAAD weapon system to the warfighter as soon as possible," said Tom McGrath, vice president and program manager for THAAD at Lockheed Martin. "Lockheed Martin remains focused on ensuring THAAD is reliable, affordable and effective."

THAAD interceptors are produced at Lockheed Martin's Pike County Facility inTroy, Ala. The launchers and fire control units are produced at the company's Camden, Ark., facility. A contract for the delivery of the first two U.S. Army Batteries was awarded to Lockheed Martin in late 2006.

Since 2005, the THAAD development program has completed 11 flight tests, with seven intercepts in seven attempts. THAAD is the only missile defense system with the operational flexibility to intercept in both the endoand exo-atmospheres to provide versatile capability to the warfighter.

Two THAAD batteries have been activated at Fort Bliss, Texas. The first THAAD Battery (A-4 ADA Battery) was activated in May 2008. In October 2009, the U.S. Army activated the second THAAD Battery (A-2 ADA Battery). Unit training for this Battery began earlier this year.

A key element of the nation's Ballistic Missile Defense System (BMDS), THAAD is a Missile Defense Agency program, with the program office located in Huntsville, Ala. The Agency is developing the BMDS to defendthe United States, its deployed forces, friends and allies against ballistic missiles of all ranges and in all phases of flight.

Lockheed Martin is a world leader in systems integration and the development of air and missile defense systems and technologies, including the first operational hit-to-kill interceptor. It also has considerable experience in interceptor design and production, infrared seekers, command and control/battle management, and communications, precision pointing and tracking optics, as well as radar and signal processing. The company makes significant contributions to all major U.S. missile defense systems and participates in several global missile defense partnerships.

Headquartered in Bethesda, Md., Lockheed Martin is a global security company that employs about 132,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation's 2010 sales from continuing operations were \$45.8 billion.
