"Communications is critical to the Commands," said Cliff Spier, Lockheed Martin Information Systems & Global Solutions-Defense's vice president for C2 Solutions. "The seamless operations provided by the 721st team is essential to our nation's security."

The program provides Missile Warning, Air Defense, and Space Surveillance mission support to North American Aerospace Defense Command (NORAD), US Northern Command, US Strategic Command, and US Air Force Space Command. In addition, the team provides base communications IT support for all Cheyenne Mountain Complex (CMC) customers.

The CMC outside Colorado Springs, Colo., is the main correlation center for the Integrated Tactical Warning and Attack Assessment (ITW/AA) system which provides North American National Leadership with threat assessment data.

Headquartered in Bethesda, Md., Lockheed Martin is a global security company that employs about 132,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation's 2010 sales from continuing operations were $45.8 billion.
