Angela Heise Of Lockheed Martin Wins Federal 100 Award

Annual Award Recognizes Innovation and Leadership in Government IT

ALEXANDRIA, Va., Feb. 5, 2013 /PRNewswire/ -- Lockheed Martin (NYSE: LMT) today announced that Angela Heise, a vice president with Information Systems & Global Solutions, is a 2013 Federal 100 (FED 100) Award winner. Fed 100, sponsored by *Federal Computer Week*, recognizes leaders in the government information technology community who demonstrate "just how important the individual can be in bringing real change to federal technology."

Heise's recognition as an innovative leader in the IT industry is a result of the work she led in her previous role as the program manager for the Army Corps of Engineers Information Technology (ACE-IT) contract, located in Vicksburg, MS.

"It is a huge honor to be recognized in this way and to be included among some of the best professionals in our field," said Heise. "This award belongs to the talented and committed team at ACE-IT, who daily deliver insight, innovation and proven best practices to help the U.S. Army Corps of Engineers carry out their missions."

The ACE-IT team was able to improve initiatives for project management, asset management, information assurance and cyber security – all while meeting affordability expectations of the customer. Angela and her team also supported contingency and surge operations for the U.S. Army Corps of Engineers during many of the 2012 severe weather happenings including "Superstorm Sandy" that hit the northeastern United States.

"Angela has consistently demonstrated the ability to build strong relationships with customers to drive innovation into their programs," said Gerry Fasano, President-IS&GS-Defense. "More importantly, I'm proud of how, together, the Lockheed Martin team and the Army Corps of Engineers partnered to provide innovative and cost-effective solutions in support of the mission."

Heise is currently the vice president of Enterprise IT Solutions for IS&GS-Defense. In this position, she leads an employee workforce of approximately 2,100 people supporting a variety of U.S. Army, Air Force and Department of Defense customers with managed services, engineering services, information assurance, cyber security, enterprise architecture and application development.

About ACE-IT:

ACE-IT is the provider of Information Management/Information Technology (IM/IT) support for the U.S. Army Corps of Engineers. The ACE-IT mission is to provide transformed enterprise-wide IM/IT services for all information management functional areas to include automation, communication, information assurance, records management, printing and publications, and visual information.
