Lockheed Martin Cyber Systems And Services Now Available On U.S. General Services Administration Products List

Cross Domain Experts Provide Certified Information Assurance Support & Services

DENVER, Feb. 12, 2013 /PRNewswire/ -- Continuing efforts to offer customers more access to its cyber security solutions, several cross domain solution products developed by Lockheed Martin (NYSE: LMT) have been added to the U.S. General Services Administration (GSA) schedule of products and services. The GSA Schedule is the most widely used government contract vehicle focused solely on procuring goods and services.

"For years we have developed cross domain solutions that allow our customers to securely share top secret, secret and unclassified data," said Jim Quinn, vice president of C4ISR Systems for Lockheed Martin Information Systems & Global Solutions-Defense. "Having our products and services available on the GSA Schedule simplifies the acquisition process and helps new customers benefit from our cross domain solutions expertise."

Lockheed Martin's cross domain solutions allow data to be exchanged across all security domains by users with different levels of security clearance. These systems not only meet critical mission collaboration requirements for securely sharing top secret, secret and unclassified data, but also maximize interoperability between the U.S. intelligence community, Department of Defense (DoD), and coalition partners. More than 150 data types are fully supported for the automatic exchange of data and new data types are added regularly as customers realize the potential of automated sanitization and sharing. Systems can be tailored to guard, sanitize, transliterate and/or reformat information. Lockheed Martin uses standard protocols to integrate cross domain information flows into customer systems without modifying existing standards-based communications software.

For more information on the cross domain solutions on the Lockheed Martin GSA site, visithttps://www.fedmall-lmco.com. Lockheed Martin's cross domain solutions are also on the Unified Cross Domain Management Office's (UCDMO) baseline list of accredited systems. This is the list of systems verified to transfer DoD and intelligence community information between multiple security domains with limited risk.

Headquartered in Bethesda, Md., Lockheed Martin is a global security and aerospace company that employs about 120,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration, and sustainment of advanced technology systems, products, and services. The Corporation's net sales for 2012 were $47.2 billion.
