

Lockheed Martin Delivers 100th Targeting System For F-35

PR Newswire
ORLANDO, Fla.

ORLANDO, Fla., July 12, 2013 /PRNewswire/ -- Lockheed Martin (NYSE: LMT) recently delivered the 100th [Electro-Optical Targeting System \(EOTS\)](#) for the F-35 Lightning II. EOTS provides affordable, high performance multifunction targeting to the F-35's full spectrum of military operations.

EOTS is the first sensor that combines forward-looking infrared and infrared search and track functionality to provide F-35 pilots with situational awareness and air-to-air and air-to-surface targeting from a safe distance. This technology allows aircrews to identify areas of interest, perform reconnaissance and precisely deliver laser and GPS-guided weapons.

"F-35 pilots can use the imagery to determine exactly where to strike while staying out of harm's way," said Ken Fuhr, director of fixed wing programs at Lockheed Martin Missiles and Fire Control. "Delivering our 100th F-35 EOTS is one step closer to ensuring all F-35 pilots can perform their missions and return home safely."

Lockheed Martin is currently producing EOTS under the seventh low-rate initial production contract. Planned production quantities for the F-35 exceed 3,000 aircraft with deliveries through 2030.

Key components of EOTS are manufactured at the company's Ocala, Fla., and Santa Barbara, Calif., facilities. In addition to EOTS, Lockheed Martin also manufactures the low observable window for the aircraft at the company's Orlando, Fla., facility.

The F-35 Lightning II is a 5th generation fighter, combining advanced stealth with fighter speed and agility, fully fused sensor information, network-enabled operations and advanced sustainment. Three distinct variants of the F-35 will replace the A-10 and F-16 for the U.S. Air Force, the F/A-18 for the U.S. Navy, the F/A-18 and AV-8B Harrier for the U.S. Marine Corps, and a variety of fighters for at least 10 other countries.

Lockheed Martin Missiles and Fire Control is a 2012 recipient of the U.S. Department of Commerce's Malcolm Baldrige National Quality Award for performance excellence. The Malcolm Baldrige Award represents the highest honor that can be awarded to American companies for achievement in leadership, strategic planning, customer relations, measurement, analysis, workforce excellence, operations and business results.

Headquartered in Bethesda, Md., Lockheed Martin is a global security and aerospace company that employs about 118,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation's net sales for 2012 were \$47.2 billion.
