The [Lockheed Martin Cyber Security Alliance](#) combines the strengths of market leading companies' solutions and integrates their best practices, hardware, software, and tools within a research, development and collaboration center called the [NexGen Cyber Innovation and Technology Center](#). These new entrants join other alliance partners which include: APC by Schneider Electric, ArcSight, CA, Cisco, Citrix, Dell, EMC Corporation and its RSA security division, HP, Intel, Juniper Networks, McAfee, Microsoft, NetApp, RSA, Symantec, Trustwave, Verizon and VMware.

"The addition of three market-leading companies in the cyber security and data analytics marketplace will help us meet the challenges of today's constantly evolving cyber threats using an intelligence-driven approach," said Charlie Croom, vice president, Cyber Security Solutions at Lockheed Martin Information Systems & Global Solutions.

Partner solutions will converge within the world-class Lockheed Martin NexGen Cyber Innovation and Technology Center, which fosters an agile environment where technologists and customers can rapidly collaborate to provide innovative new capabilities that build upon the foundation of point solutions to deliver seamless and secure end-to-end integration.

Each of the three new partners brings unique strengths and capabilities:

- [FireEye](#) has invented a purpose-built, virtual machine-based security platform that provides real-time threat protection to enterprises and governments worldwide against the next generation of cyber attacks.
- [Red Hat](#) is a leading provider of open source software solutions, using a community-powered approach to reliable and high-performing cloud, Linux, middleware, storage and virtualization technologies.
- [Splunk Inc.](#) provides a big data indexing engine for machine data™. Splunk® software is used as a security intelligence platform by thousands of organizations that collect, monitor, alert, analyze and visualize machine-generated data coming from websites, applications, servers, networks, industrial control sensors and mobile devices, supporting intrusion detection, forensic investigation and incident response.

Lockheed Martin is a leading provider of cyber security solutions to government and commercial customers around the globe. Our solutions are designed with people, processes and embedded technologies to provide customers with resilient systems that are always available.

Headquartered in Bethesda, Md., Lockheed Martin is a global security and aerospace company that employs about 116,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration, and sustainment of advanced technology systems, products, and services. The Corporation's net sales for 2012 were \$47.2 billion.
