Lockheed Martin Awarded Work Transforming GSA Applications

ROCKVILLE, Md., June 11, 2014 /PRNewswire/ -- The General Services Administration (GSA) has selected Lockheed Martin (NYSE: LMT) and its teammates to provide operation, maintenance, enhancement and development services in support of its application infrastructure.

Under the CIO Applications, Maintenance, Enhancements, and Operations (CAMEO) contract, Lockheed Martin will provide technical architecture development, security services, software development support and other services. The CAMEO contract has been awarded as a task order under the GSA Alliant contract and is available for all of GSA.

The primary objective of the task order is to transform the applications of GSA's Federal Acquisition Service (FAS). FAS has a unique role in government, as America's buyer, and requires specialized applications to manage this mission. These applications, which support the FAS business portfolios, are critical in meeting that mission.

"Our work on CAMEO will modernize GSA's portfolio of applications, systems and environments while maintaining stability on critical systems," said Paul Engola, vice president of Transportation & Financial Solutions for Lockheed Martin's Information Systems and Global Solutions. "Lockheed Martin is deeply committed to GSA's work in leveraging U.S. buying power, and thus saving taxpayer dollars. Together, we'll identify new cost savings and ultimately support the agency's mission to deliver the best value in acquisition and technology services."

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 113,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation's net sales for 2013 were $45.4 billion.
