Javelin Joint Venture Demonstrates Vehicle-Mounted Missile Launch

ORLANDO, Fla., July 29, 2014 /PRNewswire/ -- The Raytheon Company (NYSE: RTN) and Lockheed Martin (NYSE: LMT) Javelin Joint Venture recently fired a Javelin missile from a remote weapon station integrated onto a wheeled vehicle at Redstone Arsenal in Huntsville, Alabama. The test demonstrated Javelin's vehicle-launch capability to an international customer that has expressed interest in purchasing vehicles integrated with Javelin.

The Javelin missile launched successfully and hit a T-62 tank target from a range of 1,000 meters. Immediately after missile launch, the remote weapon station engaged an alternate target with its ballistic weapon, demonstrating a seamless Javelin integration that supports the warfighter's requirement to quickly transition between multiple weapon systems.

"This demonstration highlights the ability to mount Javelin on a vehicle," saidRichard Benton, Javelin Joint Venture vice president and Javelin senior manager at Lockheed Martin Missiles and Fire Control. "The international customer already uses the combat-proven Javelin for dismounted troops, but this test demonstrated the Javelin's versatility and how easily it can be integrated with the vehicle to enhance mission capability."

"This effort demonstrates the Javelin Joint Venture's commitment to expand Javelin's capability beyond the current man-portable role," said Michelle Lohmeier, vice president of Raytheon Missile Systems' Land Warfare Systems product line. "We are working closely with end user customers and industry partners to provide the warfighter with an effective system for improving vehicle lethality and enhancing survivability."

About Javelin
Javelin is a compact, lightweight missile designed for one-soldier operations in all environments. It is made by the Javelin Joint Venture, a partnership between Raytheon Company and Lockheed Martin. Javelin has been adopted by international armed forces around the world. It is currently fielded with the U.S. Army and U.S. Marine Corps, and has also been approved for foreign military sales to 14 nations.
