

Pakistan Expands Lockheed Martin Sniper Advanced Targeting Pod Fleet

ORLANDO, Fla., July 14, 2015 /PRNewswire/ -- Lockheed Martin (NYSE: LMT) received a follow-on foreign military sale contract to produce and upgrade [Sniper® Advanced Targeting Pods](#) (ATP) for the Pakistan Air Force's F-16 fleet. The contract includes the production of 15 Sniper ATPs and upgrades to the Pakistan Air Force's existing 22 Sniper ATPs.

To meet the Pakistan Air Force's urgent operational need, pod deliveries will begin in late 2015. Upgrades, which will increase compatibility with the aircraft and enable enhanced features, will also begin in late 2015.

"Sniper ATP has supported the Pakistan Air Force's mission since 2010," said Rich Lovette, Sniper international program director at Lockheed Martin Missiles and Fire Control. "Additional Sniper ATPs and upgrades will give the Pakistan Air Force a more robust precision targeting capability to support the nation's security requirements."

Sniper ATP provides pilots high-resolution imagery for precision targeting, surveillance and reconnaissance missions. Sniper ATP detects, identifies, automatically tracks and laser designates small tactical targets at long ranges. It also supports employment of all laser and GPS-guided weapons against multiple fixed and moving targets.

Sniper ATP is interoperable across multiple platforms, including U.S. Air Force and multi-national F-15, F-16, F-18, A-10, B-1 and B-52 aircraft.
