

# Lockheed Martin Receives \$524 Million Contract For PAC-3 Missiles

DALLAS, Feb. 8, 2018 /PRNewswire/ -- The United States and allied military forces will upgrade their missile defense capabilities under a \$524 million contract modification for production and delivery of Lockheed Martin (NYSE: LMT) Patriot Advanced Capability-3 ([PAC-3](#)) and PAC-3 Missile Segment Enhancement ([PAC-3 MSE](#)) interceptors. This modification is in addition to the \$944 million contract awarded on Dec. 21, 2017 for PAC-3 and PAC-3 MSE production and delivery.

The contract modifications include PAC-3 and PAC-3 MSE missile deliveries, launcher modification kits, associated equipment and spares.

"PAC-3 and PAC-3 MSE give our customers unmatched, combat-proven [hit-to-kill technology](#) to address growing and evolving threats," said Jay Pitman, vice president of PAC-3 programs at Lockheed Martin Missiles and Fire Control. "PAC-3 and MSE are proven, trusted and reliable interceptors that employ hit-to-kill accuracy, lethality and enhanced safety to address dangers around the world."

The PAC-3 is a high-velocity interceptor that defends against incoming threats, including tactical ballistic missiles, cruise missiles and aircraft. PAC-3 currently provides missile defense capabilities for 11 nations – the U.S., Germany, Kuwait, Japan, Qatar, the Republic of Korea, Kingdom of Saudi Arabia, Taiwan, the Netherlands, United Arab Emirates and Romania.

Building on the combat-proven PAC-3, the PAC-3 MSE uses a two-pulse solid rocket motor that increases altitude and range to defend against evolving threats.
