Sikorsky Salutes Los Angeles County Fire Department Air Services For Superior Maintenance And Search And Rescue

LAS VEGAS, Feb. 27, 2018 /PRNewswire/ -- Sikorsky, a Lockheed Martin Company (NYSE: LMT), today honored the Los Angeles County Fire Department for its search and rescue efforts and superior helicopter maintenance while battling numerous wildfires during the 2017-2018 fire season. The recognition occurred at the 2018 Helicopter Association International Heli-Expo, where Sikorsky also presented a $15,000 donation to the Firefighter's Cancer Support Network.

In December 2000, the L.A. County Fire Department became the first municipal organization to purchase FIREHAWK® helicopters. Today, they operate three of the aircraft in the wildfire-prone region, and have purchased two additional FIREHAWK aircraft, currently in modification, expected to enter into service by March of 2019.

"During the catastrophic fires in L.A. County and our neighboring counties of 2017 and 2018, our firefighters relied heavily on an arsenal of firefighting aircraft, which included the FIREHAWK helicopter. Flying missions, day and night, the FIREHAWK enhances our fleet strength and strengthens our aerial firefighting capabilities… ultimately improving our ability to protect the lives and property of our citizens," said L.A. County Supervisor Kathryn Barger.

During the 2017-2018 fire season, record-breaking wildfires ravaged southern California requiring rigorous coordinated efforts from the L.A. County Fire Department's Maintenance Section and Air Operations. Air Operations personnel battled relentless Santa Ana winds, record heat and single-digit humidity, as they provided air support to combat each fire in the region, including the largest in California history, the Thomas Fire Incident, which scorched 281,893 acres. Maintenance staff, led by Chief of Maintenance Dennis Blumenthal, often worked through weekends, holidays and regular days off to ensure L.A. County's FIREHAWK aircraft remained operational 24/7.

By its end, the fire season resulted in over 1.2 million acres burned across California. Although 10,804 structures were destroyed and 46 lives claimed, ultimately thousands of homes and lives were saved. The L.A. County Fire Department Air Operations answered the call to service, flying in the FIREHAWK to fight back flames, and protect the four million residents of L.A. County.

In recognition of these achievements, Sikorsky presented the L.A. County Fire Department Air Operations with the Winged-S Rescue Award. Created in 1950, the award honors those who perform rescues flying a Sikorsky helicopter and acknowledges the humanitarian efforts of pilots and crewmembers who put themselves in harm's way to save others, fulfilling Igor Sikorsky's vision of the helicopter as a lifesaving machine. In addition, the Superior Maintenance award was bestowed upon the L.A. Fire Department's Maintenance Section for their superior performance in maintaining and supporting the FIREHAWK's mission.

Sikorsky also donated $15,000 to the FCSN. Founder Michael Dubron is a firefighter/paramedic for L.A. County Fire Department assigned to flight operations. Diagnosed with cancer at age 39, Dubron recovered and returned to work, and founded the FCSN to help firefighters and their families obtain immediate assistance when coping with a cancer diagnosis.

About Lockheed Martin

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 100,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.

About Los Angeles County Fire Department

The L.A. County Fire Department's mission is to protect lives, the environment, and property by providing prompt, skillful, and cost-effective fire protection and life safety services. From initiating a paramedic program in the 1970s to pioneering swift water rescue techniques, the L.A. County Fire Department is a leader and a model to fire departments around the world.

As an all-risk agency, the L.A. County Fire Department's life safety emergency services include regional wildland

fire suppression, emergency medical services, hazardous materials response, urban search and swift water rescues, 911 dispatch and field communications, aviation-mission capabilities, technical training, homeland security, prevention, and disaster preparedness. These services are provided to over four million residents across a 2,300 square mile service area covering suburban neighborhoods, city centers, commercial districts, beaches, mountains ranges, deserts and more.

About Firefighter Cancer Support Network

FCSN is a 501(c)(3) organization established by Los Angeles County Firefighter Paramedic Michael Dubron, a survivor of stage IV colon cancer. FCSN has provided assistance and one-on-one mentoring to thousands of cancer-stricken firefighters and their families. FCSN also delivers extensive firefighter cancer awareness and prevention training nationwide. In its 12th year, FCSN has active operations in 39 states, continuing its primary focus to support firefighters and their families following a cancer diagnosis.
