

U.S. Navy Orders More Lockheed Martin Enhanced Laser Guided Training Rounds

Archbald, Pa., May 15, 2018 – Lockheed Martin (NYSE: LMT) received a \$23.1 million contract award from the U.S. Navy for follow-on production of [Enhanced Laser Guided Training Rounds \(ELGTRs\)](#) to support the service's Paveway™ II Laser Guided Bomb (LGB) weapons training.

The award exercises the [initial option](#) of the contract negotiated in 2017 and extends ELGTR production into late 2020.

"ELGTR is the only proven low-cost, guided trainer for Paveway II Laser Guided Bombs around the world," said Jason Golden, ELGTR program manager at Lockheed Martin Missiles and Fire Control. "With more than 167,000 LGTR/ELGTRs delivered since the 1990s, this capability has prepared air and ground crews for challenging tactical mission environments while maintaining critical war reserve assets."

ELGTR is recognized worldwide as the only live-fire training solution for warfighters. It provides realistic LGB employment practice for GBU-10/12/16 (2,000-lb/500-lb/1,000-lb) configurations at a fraction of the cost of tactical inventory.

Lockheed Martin manufactures ELGTRs for the U.S. Navy, Marine Corps and international customers. The ELGTR is compatible with F-16, F/A-18, AV-8B and various international aircraft platforms. Ongoing development efforts are focused on ELGTR compatibility with additional platforms to further expand the user community.

In addition to ELGTR, Lockheed Martin's 350,000-square-foot production facility in Archbald, Pennsylvania, designs and manufactures combat-proven [Paveway II Plus Laser Guided Bomb](#) kits and the [Paragon™](#) direct attack munition. More than 100,000 LGB kits and 7,000 Dual Mode LGB kits have been delivered to the U.S. Navy, Marine Corps, Air Force and 24 international customers.

About Lockheed Martin

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 100,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.

PAVEWAY is a registered trademark of a third party in the EU and several other countries and is used by Lockheed Martin Corporation under license.
