Lockheed Martin's Annual Sustainability Report Highlights Resource Efficiency, Employee Wellbeing And Other Key Areas

BETHESDA, Md., April 25, 2019 /PRNewswire/ -- Lockheed Martin today released its 2018 corporate sustainability report, "The Science of Citizenship." The peer-recognized report details the corporation's approach to sustainability, which incorporates sound science and future-oriented thinking to address pressing environmental, social and governance issues.

"Around the world, we see a threat environment that is more complex, volatile and far-reaching than ever before," said **Lockheed Martin Chairman, President and CEO Marillyn Hewson** in the report's introduction. "That's why, at Lockheed Martin, we're investing in our future and finding ways to operate more efficiently now to ensure sustainability and long-term growth in the future. We know that sustainability reaches far beyond environmental protection efforts. And we're proud to provide advanced technologies that play a role in ensuring a sustainable future for all."

Lockheed Martin takes a holistic approach to sustainability, focusing efforts and reporting around five core areas: product impact, business integrity, employee wellbeing, resource efficiency and information security.

"Lockheed Martin is a part of the infrastructure of modern life. From GPS and weather satellites to battery storage and trusted AI and autonomy, we are helping create a more sustainable future," said **Lockheed Martin Senior Vice President of Ethics and Enterprise Assurance Dr. Leo S. Mackay, Jr.**. "Through our formal sustainability governance structure; our culture of doing what's right, respecting others and performing with excellence; and our legacy of anticipating and meeting customers' needs, we have built a business relevant to today and resilient for the future."

Notable Lockheed Martin highlights from the 2018 "Science of Citizenship" report include:

- Committing $100 million to workforce development initiatives
- Reducing annual energy and water costs by $23.9 million compared to 2010
- Implementing 53 energy efficiency and carbon reduction products that resulted in an estimated annual energy reduction of 29 million kWh and over $2 million in savings
- Reaching $3 billion in product sales benefitting energy and infrastructure-resiliency
- Being named to the Dow Jones Sustainability World Index, Military Times Best for Vets Index, Forbes magazine's "Best Employers for Diversity" list and Indeed.com's "Top-Rated Workplaces" and "Best Work/Life Balance" lists, among other notable recognitions

Lockheed Martin uses the Global Reporting Initiative (GRI) framework, the world's most widely used sustainability reporting framework. DNV GL, an independent third party, assured performance measures cited in the report.
