United Arab Emirates Orders Additional Lockheed Martin Sniper Advanced Targeting Pods

ORLANDO, Fla., Feb. 26, 2020 – Lockheed Martin (NYSE: LMT) received a direct commercial sale contract from the United Arab Emirates Air Force and Air Defence (AFAD) for expedited delivery of Sniper Advanced Targeting Pods (ATP), spares and upgrades. This contract marks the first integration of Sniper ATP on the Mirage aircraft.

Deliveries of Sniper ATPs and spares will support the UAE AFAD's requirement to provide precision targeting capability for their existing Mirage 2000 fleet. UAE AFAD currently employs Sniper ATP on its F-16 Block 60 aircraft.

"The additional Sniper ATPs and upgrades will enhance the UAE AFAD's precision targeting capability," said Kenen Nelson, Fixed Wing Programs director at Lockheed Martin Missiles and Fire Control.

Chosen by over 27 international customers and the U.S. Air Force, Sniper ATP is a global leader in precision targeting and intelligence, surveillance and reconnaissance. More than 1,450 pods have been delivered worldwide.

Sniper ATP detects, identifies, automatically tracks and laser designates small tactical targets at long ranges. It also supports employment of all laser- and GPS-guided weapons against multiple fixed and moving targets. Sniper ATP is interoperable across multiple platforms, including U.S. Air Force and multinational F-2, F-15, F-16, F-18, A-10, B-1, B-52, Harrier and Typhoon aircraft.
