

Media Advisory: Lockheed Martin And Cohere Technologies To Discuss Need To Accelerate Secure Wireless Connectivity At The Edge At MWC Barcelona 2023

What: Jim Taiclet, chairman, president and CEO of Lockheed Martin, and Ray Dolan, chairman and CEO of Cohere Technologies, will present “Going Hypersonic – Accelerating Secure Wireless to the Edge” at MWC Barcelona, the world’s largest and most influential connectivity event.

When: Tuesday, Feb. 28 at 09:30 a.m. CET

Where:

- In-person attendees: MWC Barcelona, Hall 4, Keynote Stage
- Virtual attendees: Livestream the event [here](#).

Why: Wireless has been a game changer for the commercial world but its benefits have been limited to well-connected metropolitan and suburban areas. Some of the greatest challenges in civil and national security, like wildfires and disaster response environments, could benefit most from secure wireless connectivity. More work is needed to unlock the power of this technology for austere environments. The chief executives will discuss how advanced commercial technology companies and global security and aerospace companies can collaborate to rapidly adapt 5G, 6G and NextG capabilities to enhance our collective security at a hypersonic pace of innovation.

Interested in Learning More About Cohere?

Cohere will be showcasing its multi-platform, multi-generational innovations at MWC Barcelona 2023 at Stand OA3B.8 (outside between Hall 3 and 5).
