Denmark Ministry Of Defence And Lockheed Martin Skunk Works® Prove F-35 Interoperability In Flight

SKRYDSTRUP AIR BASE, Denmark, May 19, 2025 /PRNewswire/ -- Lockheed Martin (NYSE: LMT) Skunk Works and the Danish Ministry of Defence (MOD) completed a successful live F-35 interoperability demonstration. This is another success in a series of Multi-Domain Operations (MDO) demonstrations proving the F-35's ability to serve as a powerful force multiplier, enabling allied forces to rapidly deploy ready-now capabilities to connect systems across the battlespace.

Danish F-35s flying out of Fort Worth, Texas, shared classified data via DAGGR-2, a Skunk Works' Open Systems Gateway (OSG) developed under a partnership with the Missile Defense Agency (MDA), through commercial satellite communications and displayed at Skrydstrup Air Base in Denmark.

"This marked a significant milestone toward enhancing Denmark's capabilities, as it enabled our MDO staff to witness in real-time the potential of the F-35's ability to collect, analyse and share advanced data across geographically dispersed networks," said Danish Air Chief, Maj. Gen. Jan Dam. "Our close collaboration with Skunk Works has been instrumental in accelerating the rapid deployment of such capabilities, and we're very pleased with the results."

"This collaboration with the Danish MOD enabled us to do what we do best at Skunk Works – rapidly deploy ready-now capabilities at a pace unparalleled in the industry and prove it through real-world flights," said OJ Sanchez, vice president and general manager, Lockheed Martin Skunk Works. This demonstration builds on our successful track record of collaboration with international partners and defines what truly sets us apart: our commitment to Open Systems Architecture, which enables seamless integration across any platform, sensor, or shooter – regardless of the manufacturer."

Lockheed Martin is committed to delivering open architecture solutions that enhance multi-domain integration capabilities across allied forces.

About the F-35
More than 1,170 F-35s are currently operational around the globe, and the fleet surpassed 1 million flight hours. The combat proven F-35 operates from 50 bases worldwide, including 10 nations operating on home soil. As adversaries advance and legacy aircraft age, the F-35 is critical to maintaining air dominance for decades to come.

About Lockheed Martin
Lockheed Martin is a global defense technology company driving innovation and advancing scientific discovery. Our all-domain mission solutions and 21st Century Security® vision accelerate the delivery of transformative technologies to ensure those we serve always stay ahead of ready.
