

# Extended-Range GMLRS Demonstrates Capability Against Area Targets

**DALLAS, Dec. 18, 2025** – Lockheed Martin (NYSE:LMT) has conducted a successful 112-kilometer flight test of its Extended-Range GMLRS (ER GMLRS) at White Sands Missile Range, New Mexico. During the demonstration, an Alternative Warhead (AW) variant of the rocket was launched from a HIMARS – validating the system’s range, accuracy and lethality.

## WHY IT MATTERS

- **Quickly becoming warfighter-ready:** This test moves the AW variant toward operational use by the U.S. Army and its international partners.
- **Range doubled:** ER GMLRS reaches 150 km, more than twice the 70km range of the standard-range GMLRS.
- **Same reliability:** Precision and reliability remain at the level users expect from the original system.
- **Expanded mission:** The extended reach allows engagement of high value, time sensitive targets with greater battlespace coverage. This reach supports counter air defense suppression and enables effects on demand across both point (unitary) and area (alternative warhead) targets.
- **Force structure efficiency:** ER GMLRS is compatible with existing HIMARS and M270A2 launchers. Lockheed Martin is providing new capability without requiring additional launch platforms or changes to existing unit organization.

## EXPERT PERSPECTIVE

- *“ER GMLRS delivers the extended range our partners need, on a platform they already trust,” said Dave Griser, vice president, Lockheed Martin Precision Fires Rockets. “This successful demonstration of our Alternative Warhead variant confirms ER GMLRS can reliably deliver precision effects against both point and area targets at double the range.”*

## WHAT’S NEXT

- **Testing:** Soldiers will demonstrate ER GMLRS AW capability through additional tests in the first half of 2026.
- **Global partnership growth:** With demand rising across Europe and the Indo-Pacific, ER GMLRS delivers longer reach and a shared multinational fires capability – strengthening U.S. and partner security networks.

## About Lockheed Martin

Lockheed Martin is a global defense technology company driving innovation and advancing scientific discovery. Our all-domain mission solutions and 21st Century Security® vision accelerate the delivery of transformative technologies to ensure those we serve always stay ahead of ready.
